

Clicker Sentences

Understanding sentences and how they work is an essential component of early literacy. If you are working with emergent writers, English language learners, or older children struggling to acquire basic literacy skills, Clicker Sentences will enable them to produce work they can be proud of while learning the key skills necessary for independent writing.

Build sentences the Clicker way

Clicker Sentences enables you to create sentence building activities on any topic, designed specifically to support each student's individual needs. Each sentence grid contains all the words required to build a sentence. Students tap each word to create the sentence in their document and then swipe to move on to the next sentence in the set, quickly building a significant piece of writing.

Encourage self-assessment with realistic speech feedback

Students benefit from realistic speech support as they work, encouraging them to re-read their sentences and check that they make sense. Children can use the Sound Shift tool to listen to any of the words before they send them into the document.

Provide additional support with model sentences

Differentiate the support offered in each sentence building activity, to enable every student to achieve writing success. As a first step, display the completed sentence as a model on the grid to copy. As students progress, add the model in the form of a pop-up – children can see the sentence but must close the pop-up before they can continue. With an auditory model, children are required to listen carefully before writing. For children at the first stage of sentence writing create a guided-order activity to step them through the process.

Activity making, made easy!

Set up any sequence of sentences for your learners in a few seconds by simply typing or pasting them in. The intuitive Edit Mode makes modifying the activities to your specific requirements incredibly simple.

Designed with the classroom in mind

The child-friendly interface, lowercase keyboard, and Sassoon font create an engaging environment for your students to work in. Customizable settings make Clicker Apps accessible for a wide range of students.

Free resources

Access topic-specific Sentence Sets and Word Banks created by our curriculum team, searchable within the app. New resources are added regularly to our LearningGrids site. (www.learninggrids.com).

Clicker 6 compatible

Clicker Apps and Clicker 6 are able to work together. Create activities within Clicker 6 and then export them to your iPads, or open your students' Clicker Apps files in Clicker 6.

Please see the App Store for latest device specification.
